

Hydraulic High Pressure Washer

HL-KB1X41

This hydraulic high pressure washer includes one high pressure water pumps which delivers 40l/min at 140 bar. Piping and cabinet is made of stainless steel. See-through splash guard in front.

All users can be connected to the same outlet. The HP unit will adjust waterflow automaticly and is not sensitive to nozzle and lance variations.

This unit is low maintenance and very reliable.

Can be used with seawater and temperatures up to 45°C. Can run higher temperatures by changing the water seals. We can make special HP units on request.

Proportional valve block:	Brevini HPV41
Hydraulic motor:	Parker F12-30
High pressure pump:	Mazzoni GM
Cabinet:	St. steel 304
Electrical starter cabinet:	400x400x200mm
Optional:	Inlet level tank

Technical data:

Water Pressure:	80-140bar
Water flow:	10-40 l/m
Water temperature:	5-45°C
Min. oil pressure:	100 bar
Max. oil flow:	60 l/m
