Whether it's dairy, beer, viscous food-stuffs or fine-chemical products – product quality and profitability are what counts in the end. This is precisely what the GEA Flow Components business unit stands for – it's a specialist with many years of experience for everything that flows.

The GEA Group

The GEA Group, with operations worldwide, is divided into six segments. One of these is GEA Mechanical Equipment, which consists of the three business units: GEA Flow Components, GEA Homogenizers and GEA Mechanical Separation.

The GEA Flow Components business unit

As a technology leader, the GEA Flow Components business unit develops and produces well-engineered process components and services for smooth production processes in the treatment of liquid products.

The business unit is comprised of GEA Tuchenhausen in Germany, GEA Aseptomag in Switzerland and GEA Breconcherry in Great Britain as well as further sites in France, Poland, China, India, Canada and the USA.

Four business lines – for everything that flows

The product range of the GEA Flow Components business unit includes hygienic and aseptic valve technology, hygienic pumps and cleaning technology, particularly for the brewing, beverages, dairy and food industries, as well as for the pharmaceutical, health care, biotechnology and fine chemicals industries.

Hygienic valves and components from GEA Tuchenhagen form the core component of matrix-piped process plants. For aseptic processes, which require components with the highest levels of sterility, GEA Aseptomag produces aseptic valves and systems that also meet specific requirements.

The hygienic pump range from GEA Tuchenhagen also belongs to the business unit's range of solutions. This includes non-self priming and self-priming centrifugal pumps, as well as rotary piston pumps. Rounding off this range of solutions, GEA Breconcherry offers cleaning technology especially developed for the sustainable conservation of valuable resources.

The GEA Flow Components business unit focuses on major process solutions for the food processing, pharmaceutical and biotechnology manufacturing industries with leading hygienic and aseptic valve technology, pumps and cleaning technology.

GEA Breconcherry cleaning technology – the solution for every cleaning process

Our cleaning equipment has been developed for sustainable practice, with special emphasis on saving valuable resources in the cleaning process.

Whether using orbital, rotary or static, our cleaners achieve the best cleaning results in multiple industry sectors.

Incorporating our systems into your production can help you to reduce production downtime, waste disposal costs, and water and detergent consumption.

We offer economical, flexible and service-oriented solutions:

Economical

- Reduction in consumption of energy, water, and cleaning agents
- Time and labor required for cleaning is minimized

Flexible

- Diverse range of orbital, rotating, and static cleaners
- Customized cleaning solutions for many different kinds of applications and tank sizes
- Various different spray patterns
- ATEX-exempt and FDA-compliant
- Different cleaning times possible

Service-oriented

- Tailored Engineering Support
- Digital tools (e.g. 3D models)
- Easy-to-maintain
- Onsite cleaning tests

Examples of applications and industries:

Applications:

- Process vessels
- Storage tanks
- Lauter tuns
- Milk tanks
- Spray dryers
- Fermenters
- Silos
- Mixers
- Batch blenders
- Shipping containers
- Tanker trucks
- IBCs
- Container wash tunnels
- etc.

Industries:

- Brewing and beverage industries
- Dairy and food industries
- Cosmetics industry
- Pharmaceuticals industry
- Fine chemicals industry
- Biotechnology industry
- Chemicals industry
- Paint industry
- etc.

Orbital cleaners

Orbital cleaners work on the basis of two rotating axes, one horizontal and one vertical, as shown in the illustration.

- Hygienic design
- Ball bearing free (exception TMC)
- Slim, compact design
- Intensive cleaning with targeted jets
- Long life
- Easy-to-maintain
- Driven by the cleaning medium (exception TMC)
- Low number of components (orbital cleaners Typhoon, Tempest, Tornado all use the same spare parts)
- Reproducible cleaning by monitoring of the rotation with sensor SMW 100 or Veri-Clean (optional)

Rotating jet cleaner

The proven cleaning method of the jet cleaner achieves optimum cleaning results with powerful, slowly rotating fan-spray jets.

- Operates with minimal drive pressure
- Driven using fluid transmission
- Functionally robust
- Easy to maintain
- Integrated cleaning lance
- Various possible spray patterns using different nozzle arrangements on the spray head
- Long life due to wear-resistant components
- For reproducible cleaning, the rotation monitoring option is recommended

Rotating cleaners

The optimum cleaning effect of the rotating cleaners is produced by targeted flat jets or fast moving high impact droplets

- Hygienic design
- Ball bearing free
- Low number of components

Spray balls

Spray balls as static cleaners are designed for flush cleaning with a high flow rate, thus providing powerful flushing at low pressure.

- Low capital outlay
- No wearing parts
- Various possible spray patterns, materials, and surfaces
- High flow rates

Retractors In-Line Sprayer / MR1/MR2

The In-Line Sprayer has an extendable spray head that only extends into the product space during cleaning – which is especially useful for cleaning tanks with moving fixtures (such as agitators, scrapers, etc.) and for large pipes. After cleaning, the spray head retracts into its inoperative position.

- Savings on cleaning agents due to targeted cleaning
- Demonstrable process reliability and functional reliability
- Range of seal materials

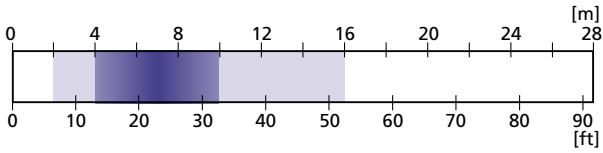

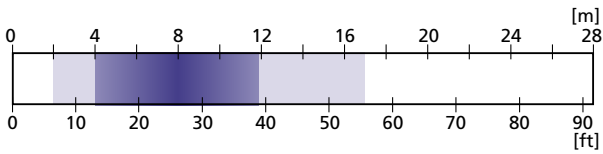

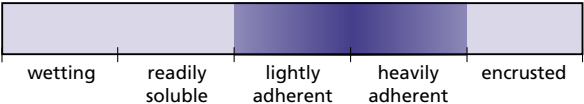

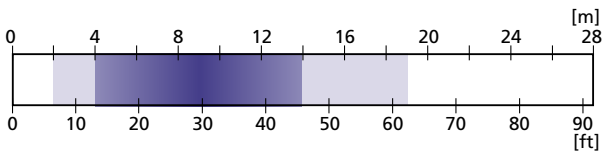

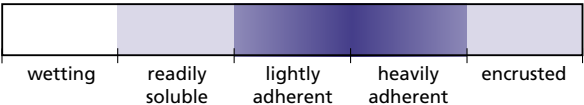

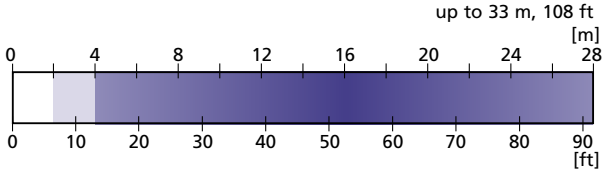

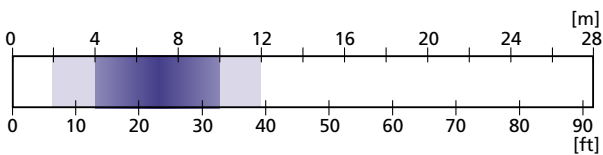

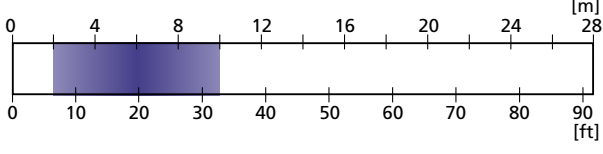

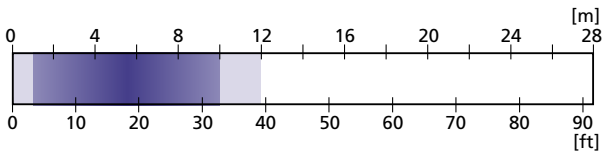

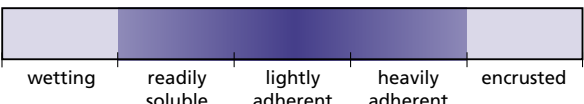

In-Line Sprayer

Other applications on request

* = Depending on installation circumstances

** = Anorganic acids such as nitric or sulfid acid

This overview of sealing material is based on manufacturer's information not considering the operating conditions.

The contact time can negatively affect the service life of the seals.

The sealing materials comply with the regulations of FDA 21 CFR 177.2600 or FDA 21 CFR 177.1550.

Diagrams and Cycle Times

*All Diagrams and cycle times are based on a cleaning medium of:
 density 1 kg/dm³, viscosity 1 mm²/s, temperature 20 °C, tolerance ±10%*

- Powerful compact jetting cleaner
- Low flow rate
- Fits through 100 mm / 4 inch diameter hole
- High spray dwell time
- Similar to Typhoon, Tempest, Tornado for maintenance purposes

Approx. cycle times

Pressure	Nozzles Ø 3 mm	Nozzles Ø 4 mm
4 bar	2 min	3 min 30 s
6 bar	1 min 45 s	2 min 45 s
8 bar	1 min 30 s	2 min 15 s
10 bar	1 min 15 s	2 min

Recommended

working pressure:	4 - 10 bar (58 - 145 psi)
Cleaning diameter:	max. 16 m (52 ft)
Flow rate:	2.7 - 5.8 m ³ /h (45 - 97 l/min / 11.9 - 25.6 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 100 mm (3.94 inch)
Materials:	stainless steel 316L (1.4404), C-PTFE or PTFE, C-PEEK
Weight:	approx. 2.0 kg (4.4 lbs)
Preferred mounting position:	any

Version 1

	Part number

¹ optional with Pin Fix connection

² suitable for use in potentially explosive atmospheres

Dimensions (mm / inch)

Working pressure:	1 - 25 bar (14.5 - 362.6 psi)
Cleaning diameter:	max. 12 m (39.4 ft)
Flow rate:	0.5 - 8.25 m ³ /h (8.3 - 137.5 l/min / 2.2 - 36.3 USgpm)
Spray angle:	360°
Operating temperature:	max. 90 °C (194 °F)
Ambient temperature/SIP:	max. 130 °C (266 °F), 30 min
Insertion opening:	min. Ø 50 / 96 mm (1.96 / 3.78 inch)
Materials:	stainless steel 316L (1.4404), PTFE
Pipe connection:	3/4" BSP / female thread
Weight:	approx. 11 kg / 15 kg (24.25 / 33.06 lbs)
Preferred mounting position:	any

- Variable volume flows and working pressures
- Different speed with frequent inverter
- Working pressure up to 25 bar (362.6 psi)

Dimensions (mm / inch)

Working pressure:	2.3 - 4.3 bar (33.4 - 62.4 psi)
Cleaning diameter:	max. 10 m (32.8 ft)
Flow rate:	7 - 29 m ³ /h / 116 - 483 l/min / 30.8 - 127.7 USgpm
Operating temperature:	max. 80 °C, 30 min / optional 90 °C
Ambient temperature/SIP:	max. 130 °C, 30 min with PTFE version only
Insertion opening:	min. Ø 100 mm
Materials:	stainless steel 1.4571 (316TI) / PP up to 80 °C / EPDM stainless steel 1.4571 (316TI) / PTFE up to 90 °C / EPDM
Pressure supply port / tank connection:	variable
Weight:	approx. 11 kg (24.25 lbs)
Preferred mounting position:	vertical down

- Robust, low-maintenance
- Variable spray pattern
- Low pressure required
- Slow controlled rotation
- Optional built-in sensor to monitor functioning
- Can be used in the tank safety system

Form G - flange, DN 100 PN 16 to DIN 2501

Form E - screwed union, conical fitting / round slotted nut DN 100 to DIN 11851

Form D - GEA Tuchenhagen VARIVENT® grooved flange, DN 100 PN 10 with O-ring design

Form A - weld-in flange, split version, fitted from the inside

C-PTFE

Chemidisc 100	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	4.6 m (15.1 ft)
Flow rate:	5.7 - 8 m ³ /h (95 - 134 l/min / 25.1 - 35.6 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 55 (2.17 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
1" BSP female / C-PTFE ²	4660-1137-103
1" BSP female / PTFE	4660-1103-122

² suitable for use in potentially explosive atmospheres

Dimensions (mm / inch)

PTFE

C-PTFE

Chemidisc150	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	5 m (16.4 ft)
Flow rate:	9.8 - 13.2 m ³ /h (163 - 220 l/min / 43.1 - 58.1 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 75 mm (2.95 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
1 1/2" BSP female / C-PTFE ²	4660-1112-133
1 1/2" BSP female / PTFE	4660-1114-122

² suitable for use in potentially explosive atmospheres

Dimensions (mm / inch)

Torus 50	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 2.2 m (7.2 ft)
Flow rate:	0.9 - 2 m ³ /h (15 - 33.3 l/min / 4 - 8.8 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	BSP/NPT min. Ø 42 mm (1.65 inch) / Pin Fix 58 mm (2.38 inch)
Materials:	stainless steel 316L (1.4404) with PTFE or C-PTFE
Preferred mounting position:	any

- Ultrahygienic
- Low consumption of cleaning medium
- Effective wash - due to high rotation speed
- Low working pressure

Version	Part number
3/8" BSP female / C-PTFE ²	4660-1708-113
3/8" BSP female / PTFE	4660-1723-112
3/8" NPT female / C-PTFE ²	4660-1726-213
3/8" NPT female / PTFE	4660-1726-212
Pin Fix for 1/2" OD pipe (12.7x1.6 mm) C-PTFE ²	4660-1713-413
Pin Fix for 1/2" OD pipe (12.7x1.6 mm) PTFE	4660-1724-412

² suitable for use in potentially explosive atmospheres

BSP female thread

Pin Fix

Dimensions (mm / inch)

- Ultrahygienic
- Low consumption of cleaning medium
- Effective wash - due to high rotation speed
- Low working pressure

Torus 75	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 3.3 m (10.8 ft)
Flow rate:	1.8 - 4.6 m ³ /h (30 - 76.7 l/min / 7.9 - 20.3 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	BSP/NPT min. Ø 52 mm (2.05 inch) / Pin Fix 68 mm (2.38 inch)
Materials:	stainless steel 316L (1.4404) with PTFE or C-PTFE
Preferred mounting position:	any

Version	Part number
1/2" BSP female / C-PTFE ²	4660-1741-113
1/2" BSP female / PTFE	4660-1754-112
1/2" NPT female / C-PTFE ²	4660-1708-116
1/2" NPT female / PTFE	4660-1755-212
Pin Fix for 3/4" OD pipe (19.05x1.6) C-PTFE ²	4660-1744-413
Pin Fix for 3/4" OD pipe (19.05x1.6) PTFE	4660-1757-412

² suitable for use in potentially explosive atmospheres

Dimensions (mm / inch)

Pin Fix

BSP female thread

Dimensions (mm / inch)

Torus 100

Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 4.8 m (15.7 ft)
Flow rate:	3 - 7.1 m ³ /h (50 - 118.3 l/min / 13.2 - 31.3 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	min. Ø 85 mm (3.35 inch)
Materials:	stainless steel 316L (1.4404) with PTFE or C-PTFE
Preferred mounting position:	any

- Ultrahygienic
- Low consumption of cleaning medium
- Effective wash - due to high rotation speed
- Low working pressure

Version	Part number
Pin Fix for 1" OD pipe (25.4x1.6) / C-PTFE ²	4660-1701-413

PTFE

C-PTFE

Chemitorus 75	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 3.3 m (10.8 ft)
Flow rate:	1.8 - 4 m ³ /h (30 - 66.7 l/min / 7.9 - 17.6 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	min. Ø 52 mm (2.05 inch)
Materials:	PTFE or C-PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- High rotation speed
- Low working pressure

Version	Part number
1/2" BSP female / C-PTFE ²	4660-1762-033
1/2" BSP female / PTFE	4660-1765-022

² suitable for use in potentially explosive atmospheres

Dimensions (mm / inch)

Photo shows cleaner with optional fixing tube

- High rotation speed
- Ultrahygienic
- Good rinsing performance

Clipdisc 100	
Working pressure:	2 - 4 bar (29 - 58 psi)
Cleaning diameter:	max. 4.3 m (14.1 ft)
Flow rate:	6 - 8.1 m ³ /h (100 -135 l/min / 26.4 - 35.7 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 80 mm (3.15 inch)
Materials:	stainless steel 316L (1.4404) with PVDF
Preferred mounting position:	any

Version	Part number
Pin Fix for 1" OD pipe (25.4x1.6 mm)	4660-1301-507

Dimensions (mm / inch)

Photo shows cleaner with optional fixing tube

- High rotation speed
- Ultrahygienic
- Good rinsing performance

Clipdisc 150	
Working pressure:	2 - 4 bar (29 - 58 psi)
Cleaning diameter:	max. 4.9 m (16 ft)
Flow rate:	11 - 15.8 m ³ /h (183 - 263 l/min / 48.3 - 69.5 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 110 mm (4.33 inch)
Materials:	stainless steel 316L (1.4404) with PVDF
Preferred mounting position:	any

Version	Part number
Pin Fix for 1 1/2" OD pipe (38.1x1.6 mm)	4660-1303-517

Dimensions (mm / inch)

- Low pressures required
- Various possible materials and surfaces
- Variable spray patterns
- Good rinsing performance

Working pressure:	1 - 2.5 bar (14.5 - 36.3 psi)
Cleaning diameter:	up to 8 m (26.2 ft)
Flow rate:	0.9 - 66.7 m ³ /h (15 - 1,112 l/min / 4 - 294 USgpm)
Spray angle:	188° - 360°
Operating Temperature:	max. 95 °C (203 °F)
Materials:	stainless steel 316L (1.4404), 316L (1.4435), 1.4539, alloy 59 (2.4605)
Pipe connection:	clip fastening / thread
Surfaces:	matt, ground, electropolished
Preferred mounting position:	any

Working pressure:	1.8 - 2.5 bar (26.1 - 36.3 psi)	
Flow rate:	2.9 - 5.4 m ³ /h (48.3 - 90.4 l/min. / 12.8 - 23.8 USpgm)	
Cleaning diameter:	max. 1.6 m (5.2 ft)	
Spray angle:	192° - 360°	
Materials:	product wetted	316L (1.4435) with EPDM / FKM or FFKM
	not product wetted	316 (1.4301) with NBR
Weight:	approx. 6 kg (13.23 lbs)	
Preferred mounting position:	any	

In-Line Sprayer in open position

In-Line Sprayer in closed position

- Spray head is not in the process during production
- Low pressures required
- Huge savings on cleaning agents due to targeted cleaning
- Demonstrable process reliability and functional reliability
- Range of seal materials
- Feedback sensor (optional)

1	6	type of wash head	1 Torus (wash head and seal) 2 Chemidisc 25 3 Chemidisc 75
1	7	seal material wetted product	1 PTFE 2 C-PTFE
1	8	elastomer seals	1 EPDM 2 FKM 4 VMQ
1	9	feedback	0 no feedback 1 1 magnetic proximity sensor (open) 2 1 magnetic proximity sensor (close) 3 2 magnetic proximity sensors I FM (open and close)
1	10	surface quality	1 machine finish inside (generally Ra 0.8 to 1.6), Ra 0.8 μm outside mechanically polished up to Ra 0.4 μm outside mechanically polished on request
0	11	certificates	0 No certificate W (41) With factory certificate 2.2 DIN EN10204 Z (42) With material test certificate 3.1 DIN EN10204 S Certificate Set incl. 3.1, FDA

Areas of application

- Aseptic measuring point
- Elastomer-free seal
- FDA/EHEDG compliant

To verify the operation of orbital cleaning devices

Weld-in sleeve system:	GEA Breconcherry
Material:	housing 1.4305
Parts in contact with media:	PEEK
Supply voltage:	18...32 VDC
Non-load power requirement:	< 20 mA
Active output signal:	max. 50 mA (PNP)
Time delay:	< 0.3 s
Response time:	< 75 ms
Ambient temperature:	-10 – + 70 °C
Process temperature:	0...+100 °C
CIP / SIP cleaning:	0...150 °C (max. 30 min.)
IP protection:	IP 65 / 67
Operating pressure:	max. 10 bar (145 psi)

Usage in water and water-based cleaning fluids

Kinematic viscosity	1.004 x 10 m ² /s
Conductivity	0.05 S/m

Tempest with monitoring sensor SMW 100

Type	Part number
Sensor SMW 100 (to monitor the functioning of orbital cleaners)	
With weld-in sleeve	222-000015
Without weld-in sleeve	222-000013

To verify operation of orbital wash heads

Material:	316L (1.4404), C-PTFE, EPDM (other elastomers on request)
Parts in contact with media:	316L (1.4404), C-PTFE, EPDM
Ambient temperature:	magnetic proximity sensor 0 - 100 °C Veri-Clean and cleaner max. 140 °C, 30 min
Compatible cleaning devices:	Veri-Clean is always supplied as a complete unit with Typhoon, Tempest, Tornado, Tornado 4 or Torrent (Cleaner has to be specified separately)
Feedback:	magnetic proximity sensor 10-30 V DC
Connection:	Inlet: 1 1/2" or 2" male connection BSP or NPT Outlet: according to Tankwasher Standard Veri-Clean housing supplied without vessel connection (customized vessel connections on request)
Surface:	machine finish inside (generally Ra 0.8 µm to 1.6 µm), Ra 0.8 µm outside mechanically polished up to Ra 0.4 µm outside on request
Preferred mounting position:	vertical

- No extra tank connections
- Includes CIP down pipe
- Variable insertion length

Version

Veri-Clean 1 1/2" BSP/948mm	4660-8818-110
Veri-Clean 1 1/2" NPT/948mm	4660-8818-111
Veri-Clean 2" BSP/948mm	4660-8818-112
Veri-Clean 2" NPT/948mm	4660-8818-113

Dimensions (mm)

Operation

- wash head turbine (1) rotates magnet (2) inside vericlean
 - external sensor (3) detects magentic field
 - stream of signal pulses generated during normal operation
- Veri-Clean housing is also the CIP down pipe
Wash head insertion length can be customised

* other lengths available on request

A/F	Indicates the size of spanners width across flats
approx.	approximately
bar	Unit of measurement of pressure [bar]
	All pressure ratings [bar / psi] are referring to excess pressure [bar g / psi g] if no other data is mentioned.
barg	Unit of measurement excess pressure [bar g]
BS	British Standard
BSP	British Standard Pipe Thread
BSPT	British Standard Pipe Tapered Thread
°C	Unit of measurement of temperature [degree Celsius]
CIP	Cleaning In Place
C-PEEK	Carbon filled Polyether ether ketone
C-PTFE	Carbon filled Polytetrafluoroethylene
CS	Turbo SSB Version CS (combined shaft)
DIN	German standard issued by DIN (Deutsches Institut für Normung e.V, German Institute for Standardization)
DN	DIN nominal width
EN	European Standard
EPDM	Material designation Short designation according to DIN/ISO 1629: Ethylene Propylene Diene Rubber
GEA	GEA AG group of companies GEA stands for Global Engineering Alliance
°F	Unit of measurement of temperature [degree Fahrenheit]
FDA	U.S. Food and Drug Administration
FKM	Material designation, short designation according to DIN/ISO 1629: Fluorine rubber (Viton®)
FFKM	Material designation, short designation according to DIN/ISO 1629 Perfluoroelastomer rubber
h	Unit of measurement of time [hour]
HNBR	Material designation Short designation according to DIN/ISO 1629: Hydrogenated acrylonitrile butadiene rubber
Inch IPS	US pipe dimension Iron Pipe Size
Inch OD	Pipe dimension acc. to British standard (BS), Outside Diameter
IP	Protection class according to IEC 60529
IPS	see inch IPS
ISO	International standard issued by the International Organization for Standardization
kg	Unit of measurement of weight [kilogram]
l	Unit of measurement of volume [litre]
M	metric
max.	maximum
min.	minimum
min	Unit of measurement of time [minute]
m	Unit of measurement of length [metre]
mm	Unit of measurement of length [millimetre]
µm	Unit of measurement of length [micrometre]
NBR	Material designation, short designation according to DIN/ ISO 1629 Acryl nitrile butadine rubber (Nitrile rubber)
NPT	National Pipe Thread
PEEK	Polyether ether ketone
PP	Polypropylene
psi	Unit of measurement of pressure, pound-force per square inch, 1 psi = 6894,75 Pa (All pressure ratings [bar / psi] are referring to excess pressure [bar g / psi g] if no other data is mentioned.)
PTFE	Polytetrafluoroethylene
PVDF	Polyvinylidene flouride
Ra	Average roughness
s	Unit of measurement of time [second]
T.VIS®	Tuchenhagen Valve Information System
V AC	Volt alternating current
V DC	Volt direct current
VMQ	Slicon rubber
W	Unit of measurement of power [Watt]
